Executive summary	5
Section one: Reason and methodology to the report	14
Section two: The aviation industry's response to the challenge of climate change	
2.1 Introduction	21
2.1.1 The key technologies in which investment is needed to improve the environmental performance of civil aircraft	23
2.2 <i>Manufacturing: research and development programmes to develop new, less polluting engines</i>	24
2.2.2 Introduction	24
2.2.3 State-funded research to improve greenhouse gas emissions	31
2.2.4 Significant engine company initiatives to improve greenhouse gas emissions	38
2.2.5 The propfan alternative	43
2.2.6 The "Clean Sky" industry initiative	44
2.2.7 Conclusions	45
2.3 <i>Manufacturing: research and development programmes to improve airframe and aircraft systems technology</i>	
2.3.1 Introduction	49
2.3.2 Towards the lighter aircraft	50
2.3.3 Towards the all-electric aircraft – improved aircraft systems	53
2.3.4 Aerodynamic improvements	58
2.3.5 Winglets	61
2.3.6 More esoteric designs – lifting bodies	63
2.4 <i>The potential of new fuels</i>	
2.4.1 Introduction	65
2.4.2 The USAF synthetic fuel-blend trials	68
2.4.3 Volvo Aero, SAS, Swedish Civil Aviation Authority and Oroboros (funded by Vinnova) alternative fuel study	69
2.4.4 Virgin Fuels	69
2.4.5 All-Electric Aircraft Propulsion – NASA Glenn	70
2.4.6 Other fuel trials – hydrogen and liquefied natural gas	71
2.4.7 Conclusions	72
2.5 <i>Airlines: new operating concepts to lower emissions/noise using current infrastructure</i>	
2.5.1 Introduction	72
2.5.2 Re-equipping with new aircraft	77
2.5.3 Painting, cleaning and more efficient MRO	81
2.5.4 Better flight planning	83
2.5.5. Optimised aircraft and crew management	86
2.5.6 Flying at optimum altitudes and more slowly	87
2.5.7 Reducing weight in the cabin	89

2.6	<i>Airports – managing emissions during taxiing and operations in and around the airport</i>	
2.6.1	Introduction	92
2.6.2	Taxiing alternatives	93
2.6.3	APU alternatives	96
2.7	<i>Air traffic management – providing more environmentally friendly routings</i>	
2.7.1	Introduction	98
2.7.2	Redesigning airspace to optimise aircraft efficiencies	100
2.7.3	The next major ATM efficiency improvement programmes	102
2.7.4	Continuous descent approaches into airports	106

Section three: Estimates of current and future environmental impact

3.1	Introduction	112
3.1.1	The Communication from the EU Commission to the Council, the European Parliament, the European Economic and Social Committee and the Committee of the Regions - ‘Reducing the Climate Change Impact of Aviation’	116
3.1.2	Intergovernmental Panel on Climate Change (IPCC) ‘Aviation and the Global Atmosphere’	116
3.1.3	Royal Commission on Environmental Pollution (RCEP) ‘Special Study: The Environmental Effects of Civil Aircraft in Flight’	117
3.1.4	The Stern Review	118
3.1.5	Stockholm Environment Institute ‘Aviation and Sustainability – A Policy Paper’	118
3.1.6	International Civil Aviation Organisation: Assembly 35th Session Working Paper: Agenda Item 15 - ‘Environmental Protection’	119
3.1.7	Massachusetts Institute of Technology MIT ‘Aviation and the Environment’	119
3.1.8	‘The possibility of introducing a kerosene tax on domestic flights in Germany’. Dr E Pache - legal opinion commissioned by the Federal Republic of Germany’s Environment Agency	120
3.2	Forecasts given within the reports analysed	121
3.3	Forecasts and recommendations of studies proposing the introduction of financial mechanisms to restrict aviation growth	122
3.4	Recommendations of studies arguing against the introduction of financial mechanisms to restrict aviation growth	124
3.5	Recommendations from the examinations of how to apply financial mechanisms to aviation	124

Section four: Regulatory and other initiatives to curb greenhouse gas emissions from aviation

4.1	Introduction	126
4.2	Pressures on governments to restrict aviation growth	126
4.3	The EU’s emissions trading scheme (ETS)	132
4.4	Emissions trading outside the EU	140
4.5	CAEP/7 and emissions trading guidelines	140

4.6	European Union initiatives and proposals beyond the ETS	141
	Appendix one: Airline initiatives to improve environmental performance	144
	Appendix two – aeronautical research programmes with environmental mitigation elements, part-funded by the European Commission	190
	Appendix three – report author biographies	233
